BLANNING

19 Priestley Rd., Bridgeman Downs, Brisbane, 4035 | 0438241626 |
jarrod.blanning@gmail.com

An energetic, hardworking and talented team member, with experience and transferrable skills gained by working in a variety of different roles. I have a friendly manner and a 'can do' attitude which will be an asset within the mining industry. I thrive on new challenges and take problem solving into my stride. I am at ease working as part of a team or acting on my own initiative.

EDUCATION AND TRAINING

2016 – 2017 **Graduate Diploma (Applied Finance)**
Queensland University of Technology
Expected completion date: November 2017
Current GPA 6.5

2004-2009 **Bachelor of Engineering (Civil)**
University of Queensland
Special interest – Mining Engineering

PROFESSIONAL WORK EXPERIENCE

2018 (June) - 2019 **Mining Engineer**
Marshall Mining Consultant, Glencore, Clermont Mine, Australia
Provided technical assistants to Glencore's Clermont Mine in medium and short term planning. Covering waste scheduling, design and reporting duties using Deswik mine planning software. The position required constant communication of plans, objectives and risks through written and verbal channels. This included running meetings and presentations with a wide and discerning audience.

Key Accomplishments:

- Mid term push back shell designs
- Short term dump design and scheduling
- Weekly reconciliation reviews
- Providing daily coal stockpile updates

2016-2018 **Brewery Owner / Marketing and Sales Manager**
Lost Palms Brewing Co., Miami, Australia

Founding member and part owner of Lost Palms Brewing co. in Miami, Gold Coast

Key Accomplishments:

- Assisted with the development and implementation of branding and key market strategies
- Installation of a 20 hectolitre brew house

- Managed customer relationships
- Develop new business, increased sales volume and distribution growth for South East Queensland

2012-2015 **Specialist Mining Engineer**

BHP Billiton Mitsubishi Alliance (BMA), Daunia Mine, Australia

Provided key optimising design guidance for the initial mine outlay during construction phase. Once Daunia became operational I transitioned into the production side of the mine assisting with the short to mid term window. This required a focus on overburden, coal mining, drill and blast as well as the overall mine layout.

Key Accomplishments:

- Greenfield Mine design
- Short term and mid-term Truck Shovel and Dozer Push designs
- Short term scheduling using X-act
- End of month reconciliation
- Mine optimisation through mine design and LV/HV separation
- Drill and Blast design and forecasting

2010-2012 **Project Engineer**

African Minerals Limited (AML), Sierra Leone

Initially employed as a graduate engineer with African Minerals and progressed to a project engineer within 2 years. While there I was a key member in the projects team, supporting the engineering function through the completion of delegated tasks at a high level. African Minerals gave myself the fortunate opportunity of being able to experience a breadth of roles not necessarily available in a larger more compartmentalised organisation.

While at AML, I provided key elements in contributing to the successful technical development of the rail line, material handling facility and processing requirements along the full scope of the project (from port to pit).

Key Accomplishments:

- Contract negotiations
- Purchasing and Procurement
- Supply and logistics
- Commissioning and completion of rail, port and mine infrastructure
- Mine infrastructure design and construction

Hobbies

- Yoga
